PROJECTS

- **College Event Portal website**
 - Engineered an immersive frontend portal for a college fest utilizing HTML and CSS languages, showcasing a commitment to cutting-edge web development.
 - This responsive design seamlessly extends support to mobile consoles, enhancing accessibility and user engagement **website-** <https://anurupdatta.github.io/College-Event-Website/>
- **News channel website (AD news)**
 - Crafted a dynamic frontend website using HTML, CSS, and Javascript to seamlessly integrate a random API from a news channel.
 - This project showcases a mastery of essential web development languages , also highlights a sophisticated integration of real-time data, providing users with a dynamic and engaging experience. **website code files -** <https://github.com/AnurupDatta/News-channel>
- **Python Network Programming(Chat room)**
 - Engineered a robust client-server program using Python, strategically employing specific libraries to ensure optimal performance and reliability.
 - This solution operates seamlessly in the command terminal, allowing for the creation of distinct server and client terminals. **Client server code files-** <https://github.com/AnurupDatta/chat-room>

HACKATHON

- Distinguished participation in the **Space India Hackathon**,contributed innovative solutions with demonstrable impact, underscoring adaptability, problem-solving skills, and a commitment to staying at the forefront of technological advancements.
